

Connectivity

Client Profile

The Harewood Estate manages all 700 acres of countryside surrounding Harewood House. Its nationally recognised conservation programme emphasises the importance of restoration of historic buildings, as well as the protection and development of wildlife habitats and the maintenance of listed parkland.

The listed farm buildings in the heart of this beautiful Estate have been carefully and thoughtfully converted to fully serviced office suites.

Challenge

Harewood Estate needed to improve the connectivity offered to all its tenants, both business and residential. The problem was distributing this connectivity across the huge space they operate within.

Alongside this, they were looking for a security solution within the estate to include a CCTV and access control solution.

Solution

razorblue provided superfast connectivity to all business premises and private tenants across the huge 700-acre estate.

In addition to this, razorblue has been able to utilise the network beyond simple connectivity to include CCTV and access control, ensuring the safety of the Harewood Estate community, this also attracts new potential tenants.

Harewood Estate also chose razorblue as their Managed IT service provider and make
