

Case Study

World class connectivity across 700 acres of estate

The Challenge:

To residential properties, the listed farm buildings in the heart of this beautiful Estate have been carefully and thoughtfully converted to fully serviced office suites. The problem was getting connectivity to all tenants - business AND residential - across this massive estate.

Client Profile:

The Harewood Estate manages the countryside surrounding Harewood House. It has a nationally recognised conservation programme with particular emphasis on the restoration of historic buildings as well as the protection and development of wildlife habitats and the maintenance of Listed parkland.

- 700-acre estate
- Rural Yorkshire location
- Residential and commercial property

w: razorblue.com

The Solution:

razorblue provided connectivity to all business premises and private tenants across the huge 700-acre estate. In addition, razorblue has been able to utilise the network beyond simple connectivity, to include CCTV and access control amongst other things.

The Result:

Harewood Estate now has world-class connectivity across its entire footprint, servicing its residential and commercial properties and thus making them much more attractive to potential tenants.
