

Connectivity

MIDDLETON LODGE

Client Profile

Middleton Lodge is an award-winning Georgian country retreat set in 200 acres of stunning North Yorkshire countryside. Popular for both hotel and leisure, the lodge offers 31 bedrooms, as well as a luxury spa and two restaurants.

The beautiful views and facilities make it a favourite for weddings, events and even film and television productions.

Challenge

The beautiful countryside views are one of Middleton Lodge's key selling points, however, this rural location meant the internet access was poor and made conventional solutions prohibitively expensive.

Solution

razorblue overcame the unique challenge presented by Middleton Lodge's location by installing a wireless point-to-point link supplying a 100MB super-fast internet access via microwave from Mowden Park, 8 miles away. The project included the deployment of a new Ruckus wireless solution across the site which now ensures that the hotel enjoys 100% coverage in all rooms and across all facilities and grounds.

razorblue also provides 24/7 managed services to ensure the smooth running of the hotel's systems day and night.

"We needed reliable connectivity for our guests, it seemed that conventional solutions wouldn't work. razorblue came up with a unique solution. I was extremely impressed by both their imagination and determination to find the right solution."
